***Please tick the appropriate boxes below***

1 a) The holding is NOT under movement restriction for bovine Tuberculosis (TB)\*

OR

1 b) The holding IS under movement restriction for bovine Tuberculosis (TB)\*

If the answer to 'B' is yes does this holding have a General Movement Licence?

- Cattle on the holding are not under movement restrictions for other animal disease or public health reasons (excluding 6 day standstill)
- Withdrawal periods have been observed for all veterinary medicines and other treatments administered to the animals while on this holding and previous holdings.
- To the best of my knowledge the animals are not suffering from any disease or condition that may affect the safety of the meat derived from them.
- No analysis of samples taken from the animals on the holding or other samples has shown that the animals in this consignment may have been exposed to any disease or condition that may affect the safety of the meat or to substances likely to result in residues in the meat.
- To the best of my knowledge the livestock supplied are not cloned animals or the first generation offspring of cloned animals.
- Please be aware that "it is illegal to transport an animal that is considered unfit for travel. This includes heavily pregnant females." This is primarily your responsibility as a producer, but can result in you or your haulier losing their licence to transport livestock. If you think a heifer may be in calf, please contact your vet for a PD.

<b>Keepers Signature</b>	
<b>Print Name</b>	
<b>Date</b>	
<b>If the animals do not fulfil all the above statements, tick this box and provide additional information on the attached document.</b> <input type="checkbox"/>
